LEAN OFFICE
OPEN ENROLLMENT

Culverhouse College of Business
Alabama Productivity Center

APRIL 29TH | 8:30-12:30

COURSE OVERVIEW:

APC's Lean Office training course teaches you the concept of Lean and how it can be used to make your office run more efficiently and with greater output. You will learn to identify which processes are value added as well as learn to pinpoint wastes in your workplace procedures. You are taught tools that you can use to analyze your processes and streamline the work you are doing. In this course, you will learn: workplace organization and layout techniques, tools for evaluation, ways to implement changes, how to best utilize employees, and more.

SIMULATION OVERVIEW:

As part of the Lean Office course, you get to participate in live simulations loaded with wastes, bottlenecks, and most importantly opportunities for improvement that are common in an office environment. You will use the Lean Office techniques you learned to work through common office tasks including: working with customers, taking orders, scheduling, interacting with other departments, and more. The goal is to have you feel a Lean transformation occur and prepare you to identify opportunities for improvement when you return to your workplace.

TOPICS INCLUDE:

- 8 Wastes of Lean
- Value Added vs. Non-Value Added
- Bottleneck
- Workload Balancing
- Utilizing Talent
- Pull System
- 5S in the Office

and more!
